# ARCHICAD BIM TRAINING PROGRAM

October'25

Dates : 16,23,27,30

---

Learn The Art of Building Design with **Archicad**.

# WHAT IS ARCHICAD?

---

**Archicad** is a **Building Information Modeling** (BIM) software created by Graphisoft in Hungary, specifically designed for architects in the AECO sector. It facilitates the design of buildings from the initial conceptual stage to the construction phase, allowing architects to operate within a BIM framework.

- Comprehensive Architectural design suite
- 2D Drafting, Sketching & Automatic documentation
- Freeform 3D Modeling & any level of LOD
- Built-in MEP modeler & Integrated structural design
- Building energy analysis, Collision Detection & Model Checker
- Visualization + live sync with D5Render, Enscape, Twinmotion, Lumion
- Connect to Grasshopper & Rhino environment
- Free BIMx Mobile/Desktop Viewer - BIM on the GO!

With **Archicad**, you can focus on what you do best: **Design Great Buildings**

**OPENBIM** is a progressive, digital, future - proof approach to improve collaboration across the AEC/O industry. It helps connecting different stakeholders involved in a building or infrastructure project by allowing them to exchange project information through neutral, non-proprietary file formats.

# TRAINING PROGRAM OVERVIEW

The Archicad BIM Training Program is designed for professionals in architecture, interior design, and civil engineering, providing an opportunity to delve into the capabilities of ArchiCAD BIM software. Participants will gain an in-depth knowledge of ArchiCAD's powerful 2D, 3D, and documentation tools, enabling a smooth transition from preliminary designs to managing the entire building lifecycle.

India

₹ 10000

18% GST EXTRA

Outside India

\$ 150

4 classes in a Month

Duration 8 hours

Online Training

Time: 7.00pm to 8.30 pm

BIM Course Completion Certificate

1 Year free license for students

Recording Session for future reference

## COURSE CONTENT

### Introduction

What is BIM?  
What is OPEN BIM workflow?  
Introduction to ARCHICAD  
ARCHICAD Interface

### Design

Door & Window Tool  
Curtain Wall Tool  
Stair & Railing Tool  
Beam & Column Tool  
Shell & Morph Tool  
3D Sections & Zones

### Documentation

Sections and Elevations  
3D Documents & Cutaway  
Details and Worksheets  
Interactive Schedule  
Label Tool & Auto text  
Navigator and Organizer

### Collaboration

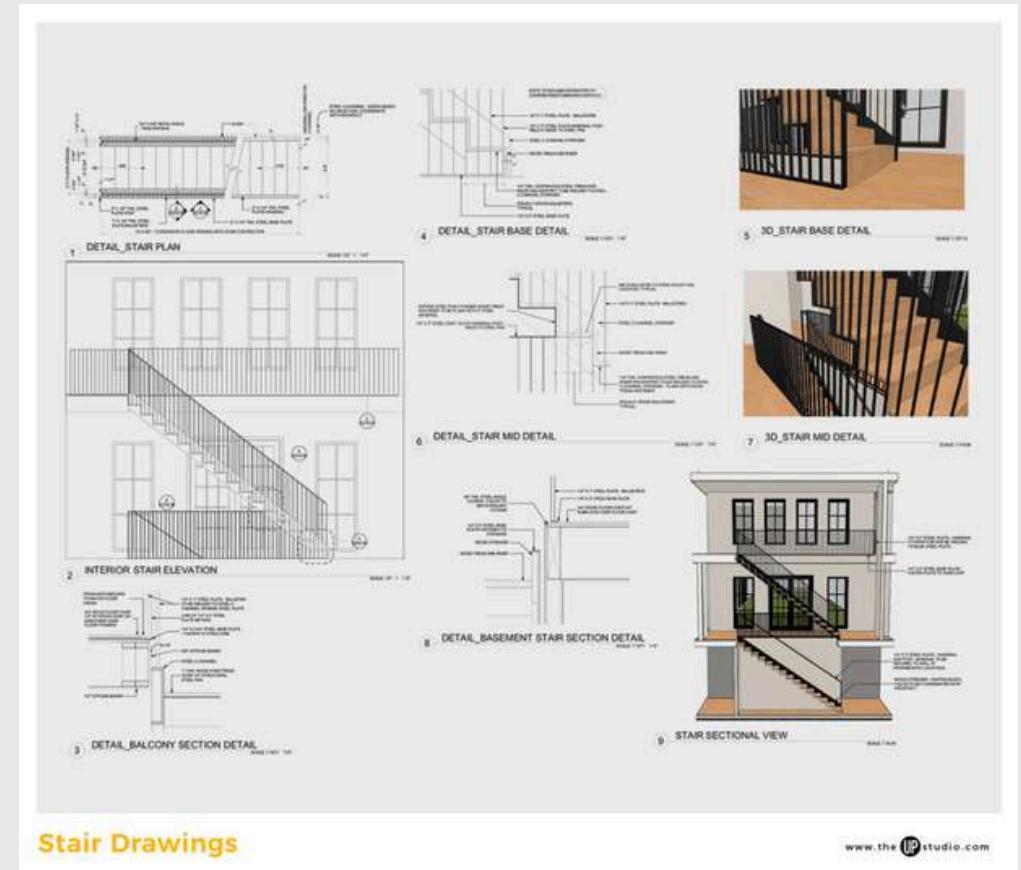

BIMx – Mobile App

# OUTPUT IN ARCHICAD

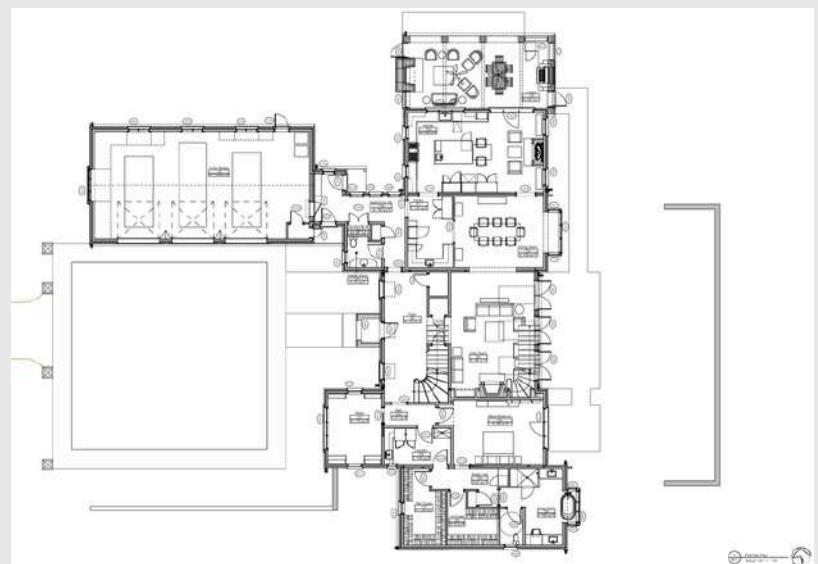

## BIM Models

## Eye-catching GFC's

Neat & Clear Drawings!

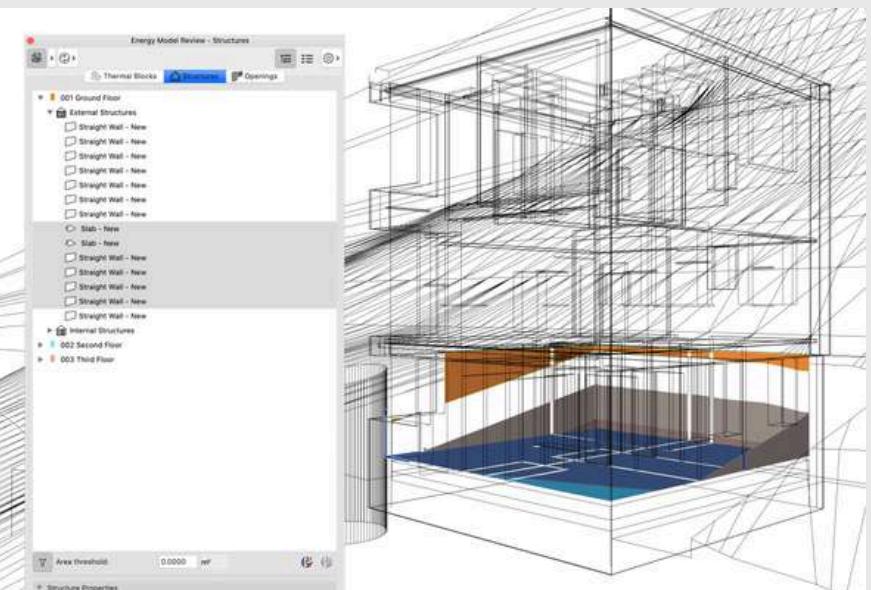

## Great 3D Views!

## Great Interiors!

## Energy Analysis

## Hypermodels & Publishing

## Teamwork & collaborate

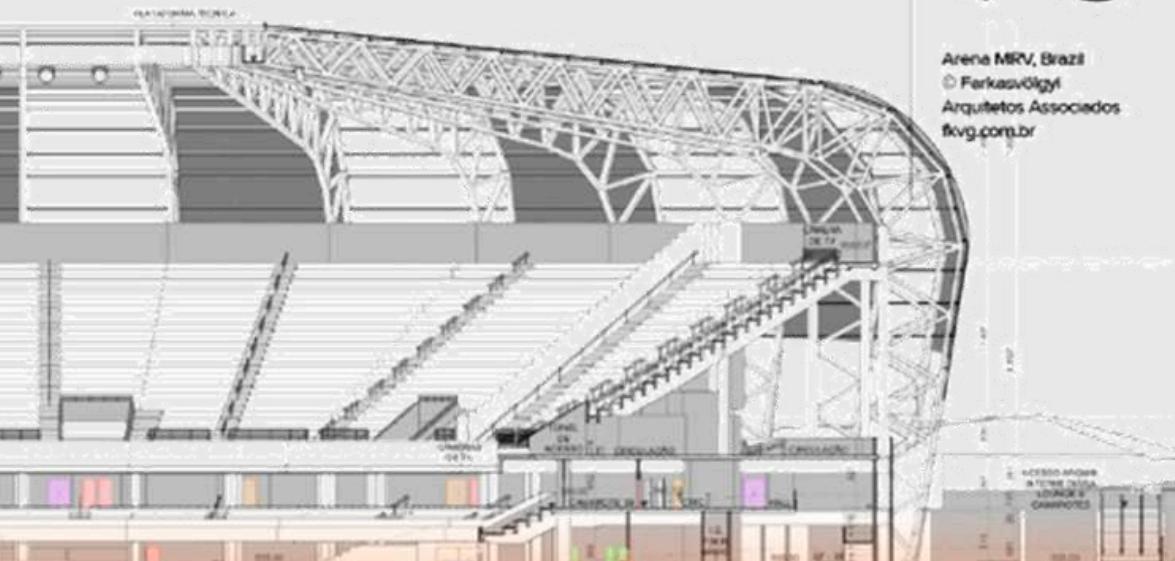

# MASTERPIECES BY ARCHICAD

---

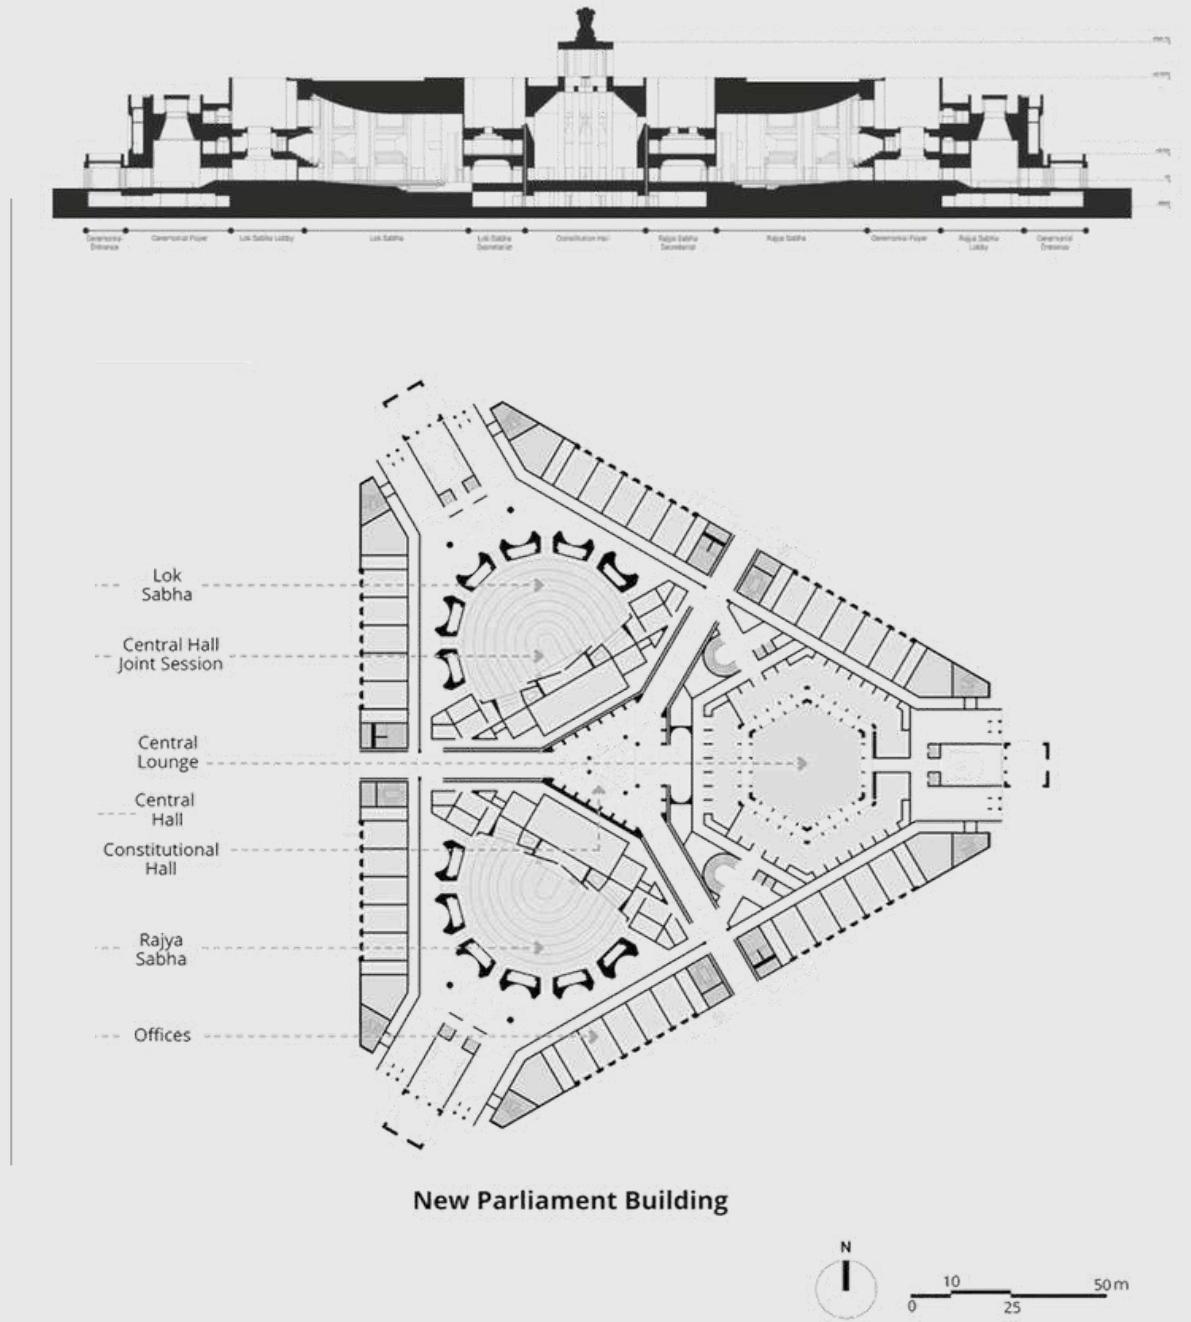

ARENA **MRV**

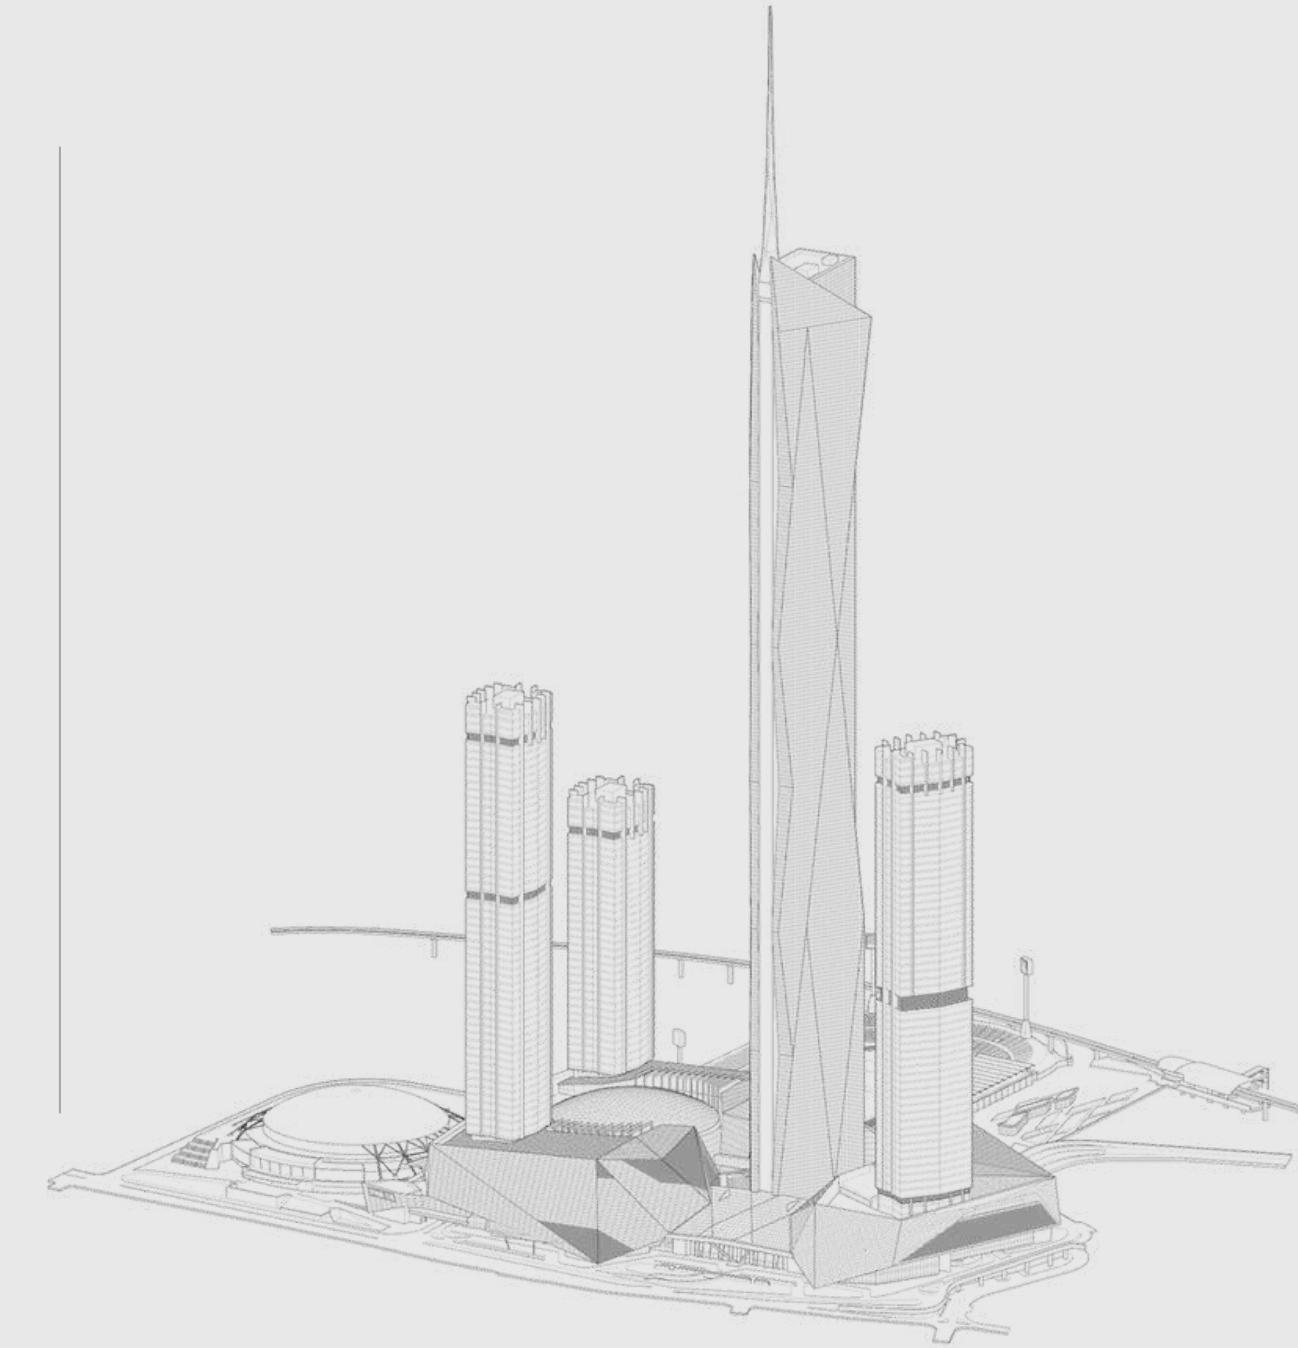

Atlético Mineiro's Arena MRV, Brazil

**FK  
VG**

Central Vista  
New Building for the Parliament of India

Merdeka 118,  
World's Second Tallest Building, Malaysia

# CUSTOMER DELIGHT

## Ar. Chetan Shivaprasad

Principal Architect - Kham design, Bangalore

"Architects should move from CAD to BIM to scale up and design more interesting Buildings. We are happy to work with **Archicad as our MAIN BIM Software.**

## Ar. Shaikh Hussain

Principal, STUDIO MIMAR, Belagavi

"Transitioning to a **BIM environment has been smooth.** The day we started using Archicad, we've experienced sheer efficiency and productivity."

## Ar. Sunil Lande

Director - Inotek Pharma Solutions, Mumbai

"We wanted to move to **BIM as a fundamental tool for Design & Engineering.** After looking into several Tools available, we decided to go with ArchiCAD as a BIM architectural design tool.

I must appreciate the way it is designed which is quite intuitive and easy to adopt. We could deploy this tool within a month of installation. The amount of flexibility and possibility it opens up for creativity is amazing."

## Ar. Nieil Sancheti

Founder - Nieil Sancheti Architects, Bangalore

ArchiCAD has truly transformed the way we work. Design is now so streamlined right from the initial concepts to presentations to developing the final working drawings. Making changes has become so easy and accurate.

We now detail in 3D and populate our drawings in 2D and 3D. It is truly a powerful and revolutionary software that has been developed by architects for architects. **Archicad is truly the future!**
